

“Higher, faster, further - BW on HANA opens up brand new perspectives for me!”

SAP Business Objects expert*

Location: Wiesbaden

What you can look forward to:

You have already demonstrated your expertise in SAP BO and are searching for new challenges and opportunities to develop. You will be part of a team helping to shape our SAP BI landscape with BW 7.3 on HANA and Business Objects 4.0. As a skilled communicator, you will help our divisions and IT consultants to implement projects in the BI environment. Working on innovative SAP projects (roll-out of BO, GRC, Portal, CRM), you will extend your personal skill profile in terms of methodology and technology. Together with your team colleagues and our external service providers, you will also be in charge of the entire SAP infrastructure.

What we can look forward to:

You have completed a degree in computer science or business informatics, have gathered several years of experience in application support and possess demonstrable expertise in the SAP BO environment. If, in addition to that, you are familiar with SAP Portal, SAP Solution Manager, SAP GRC and general business or banking issues, you will find it easier to get started. At any rate, we are looking for a team player with communication skills and an analytical mind who can build and pass on knowledge. We are looking forward to receiving your job application.

Change your perspective and send us your application – quoting the reference number **JW-2660** – by **e-mail** without delay. Please include your salary expectations and earliest possible starting date. And if you’d like to find out more about who we are and what we do – and about why a change of perspective is certain to be a good move – you can visit us online at www.aareal-jobs.com.

*** We don’t care what sex you are, as long as you are really good.**
